

March 22, 1973

state in the union has ahold of this program but something has to be done with this medical assistance program so we have some kind of administration and control and I challenge those who participate in this program to show me at the moment where we have any decent utilization studies or any decent control studies that are going to keep this anywhere near in line. Now, these two bills, keeping in mind that the medical, or the aid to dependent children program at the moment costs about \$24,000,000; 185 will add, as near as I can figure out, \$15,000,000 to that \$25,000,000. Now if administrative decisions are made and I'm told the Welfare Department will do this, of that additional \$15,000,000, roughly 6, a little over \$6,000,000 will come from the general fund, so you'd be adding, as I understand it, the ADC, you adding to the \$24,000,000, you're adding another \$15,000,000 under this bill before us. If you're talking about 235 to the \$24,000,000, you're going to add \$8,000,000 and of that \$8,000,000 if the Department makes the proper administrative decision, you're going to add \$3,000,000 general fund money. I repeat once more that we are recommending the Governor's suggestions in the entire welfare program of roughly \$109,000,000 with the understanding that nobody has assured us yet that the Federal funds that we have been getting in strategic areas are going to be with us. Nobody guarantees that after the first of January, we will not appreciably increase the medical payments program roughly \$10,000,000 to \$20,000,000. Now as has been said on this floor, with those figures staring us in the face, it's difficult to make a decision at this time which will increase this budget until somebody comes up with some firm figures as to where we are. We can be in a position before too long of having to put up all the Federal money or at least a great portion of it that we're not now putting up. If anybody has any questions, I'll be glad to try and answer them as far as figures are concerned. I've tried to give you an overall summary without boring you with a lot of details.

PRESIDENT: Next to speak was Senator Schmit.

SENATOR SCHMIT: Mr. President and Members of the Legislature. As you know my bill, L.B. 235 will follow this bill. I just would like to comment after the figures that have been given you here this morning by Senator Carpenter, Senator Chambers and now Senator Marvel, pointing out where the vast amounts of money are being spent and that the predominant amount of money is not spent, of course, on the ADC program. I think the Federal Government has a good policy and it's been used and followed for some time in regard to agricultural payments to farmers. They publish the names of all of us farmers and the amounts of money we receive from the Federal Government in the newspaper, in a news article, once a year at least and all of us who are on the dole so to speak, from the Federal Government, have the privilege of reading our name in the paper along with our neighbors and anyone else who might be receiving this money. When I hear Senator Marvel tell it that \$52,000,000 of this money goes to medical assistance, I would like to suggest and I think Senator Carpenter could perhaps handle this, that we draw an amendment to this bill or to my bill, that would read to the effect that all persons who receive money from State and Federal Governments in regard to Medicare, Medicaid, any, any medical assistance programs, find their names published periodically or routinely or regularly and--in a general newspaper. I think you'd see the doggondest scurrying for cover you ever saw.

(End of Belt #10)
